EMBARGOED UNTIL RELEASE AT 9:00 A.M. EDT, WEDNESDAY, July 23, 2003

Marian Sacks (202) 606-9274 (Estimates)

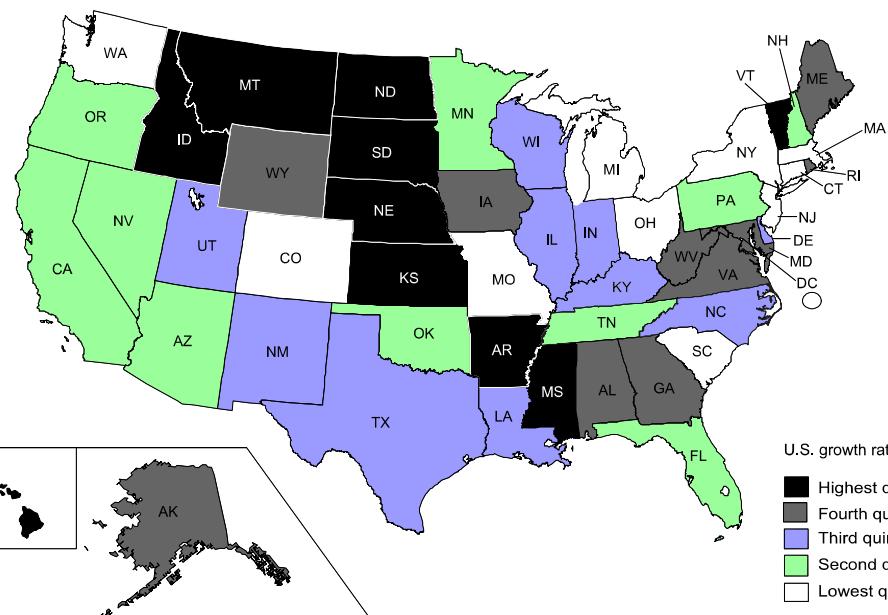

BEA 03-28

G. Andrew Bernat, Jr (202) 606-9235 (Analysis)

E-mail inquiries RegRelease@bea.gov**State Personal Income: First Quarter 2003**

Personal income growth accelerated in 39 states in the first quarter of 2003, according to estimates released today by the U.S. Bureau of Economic Analysis. The number was up from the fourth quarter of 2002, when 32 states and the District of Columbia had faster growth, and was substantially higher than in the third quarter of 2002, when only 10 states had faster growth.

Personal income for the nation, which is only available in current dollars, grew 0.9 percent in the first quarter of 2003, up from increases of 0.6 percent and 0.5 percent in the last two quarters of 2002. The first quarter increase reflected an acceleration in net earnings, partly offset by a decline in dividends, interest, and rent (DIR). Transfer payments grew at the same rate as in the fourth quarter of 2002.

Personal Income: Percent Change, 2002:IV-2003:I

Personal Income Growth by Component

Net earnings grew 1.1 percent in the first quarter of 2003 nationally, compared to 0.7 percent in the fourth quarter of 2002 and 0.6 percent in the third quarter. All states showed an increase in net earnings in the first quarter, with 34 states and the District of Columbia recording faster growth in the first quarter compared to the fourth. In contrast, only 25 states experienced an acceleration in net earnings growth in the fourth quarter.

Transfer payments grew at the same rate in the first quarter of 2003 as in the previous quarter. Thirty-three states experienced faster growth in transfer payments in the first quarter of 2003 compared to 42 states in the fourth quarter of 2002. Unemployment benefit payments, the most volatile component of transfer payments, declined 3.5 percent nationally, though a few states, notably North Dakota, Montana, and Maine, exhibited substantial growth. Together, all other transfer payments grew 1.9 percent.

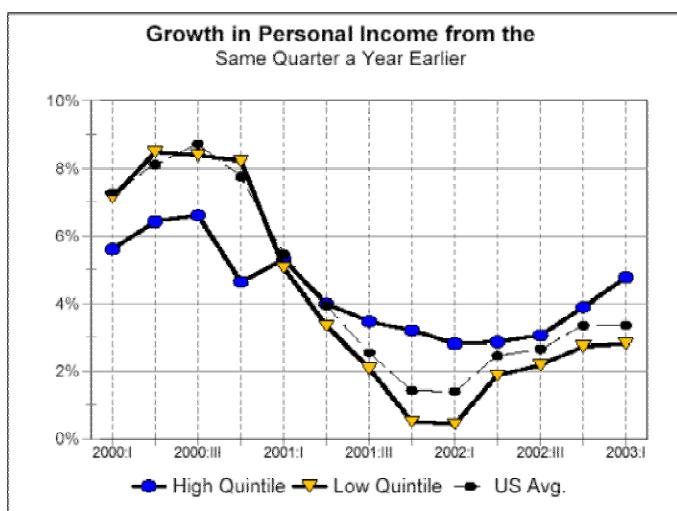

Property income (dividends, interest and rent) declined 0.1 percent in the first quarter nationally, compared to declines of 0.4 percent and 0.2 percent in the last two quarters of 2002. A 1.7 percent growth in dividends was more than offset by declines in interest and rental income.

Earnings Growth by Industry

Nationally, earnings grew in every industry except durable goods manufacturing and information. Government accounted for 0.32 of the 1.1 percent growth in earnings. Education and health services, financial activities, and professional and business services together accounted for 0.47 percentage point of the first quarter growth in earnings. Earnings growth in government contributed the most to personal income growth in 26 states and the District of Columbia, while earnings growth in natural resources and mining, primarily farming, was the largest contributor in 13 states. Fast growth in farming was particularly important in the Plains states, notably North Dakota, South Dakota, Nebraska, and Kansas, all of which were among the ten fastest growing states. Education and health services was the leading growth industry in six states, and financial activities, construction, and professional and business services were the leading growth industries in the remaining six states.

Year to Year Trends in Quarterly State Personal Income Growth

Because quarter-to-quarter changes in state personal income are subject to large swings, it is also useful to look at the change in state personal income in the current quarter relative to the same quarter a year ago. Table 5 and the below chart show the year-to-year growth rates of quarterly state personal income from the first quarter of 2000 through the first quarter of 2003.

personal income from the first quarter of 2000 through the first quarter of 2003.

U.S. personal income increased 3.4 percent from the first quarter of 2002 to the first quarter of 2003, up slightly from an increase of 3.3 percent in the previous four-quarter period. After peaking at an 8.7 percent annual increase in the third quarter of 2000, the annual change in U.S. personal income decelerated throughout 2001,

bottoming out at 1.4 percent in the fourth quarter, when the trough of the 2001 recession occurred. The growth rates have increased in each quarter since the first quarter of 2002.

Similar patterns of growth are evident for the top- and bottom-growth quintile states, where the quintiles are based on ranks of first quarter 2003 income growth. Year-to-year growth in personal income has been higher in the top quintile states than in the bottom quintile states since the second quarter of 2001. In addition, the growth rate of the top quintile increased steadily in the past two quarters whereas the bottom quintile, and the nation, grew only slightly faster in the first quarter of 2003 than in the previous quarter.

For 21 states, year to year growth was higher in the first quarter of 2003 than in the fourth quarter of 2002. Year over year growth in the first quarter ranged from 7.4 percent in South Dakota to 1.5 percent in Connecticut.

Note on the State Estimates by Industry

Beginning with 2001, quarterly state estimates of wage and salary disbursements and of earnings by industry are based on the North American Industry Classification System (NAICS). Quarterly state estimates of earnings by industry for 1948-2001 are based on the Standard Industrial Classification System. A four-quarter overlap of the two industry classification systems has been provided. All of the estimates can be accessed at www.bea.gov.

Definitions

Personal income is the income received by all persons from participation in production, from government and business transfer payments, and from government interest. Personal income is the sum of net earnings by place of residence, rental income of persons, personal dividend income, personal interest income, and transfer payments. **Net earnings** is earnings by place of work (the sum of wage and salary disbursements (payrolls), other labor income, and proprietors' income) less personal contributions for social insurance, plus an adjustment to convert earnings by place of work to a place-of-residence basis. Personal income is measured before the deduction of personal income taxes and other personal taxes and is reported in current dollars (no adjustment is made for price changes).

The estimate of personal income in the United States is derived as the sum of the state estimates; it differs from the estimate of personal income in the national income and product accounts (NIPA's) because of differences in coverage, in the methodologies used to prepare the estimates, and in the timing of the availability of source data.

BEA groups all 50 states and the District of Columbia into eight distinct regions for purposes of data collecting and analyses: **New England** (Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont); **Mideast** (Delaware, District of Columbia, Maryland, New Jersey, New York, and Pennsylvania); **Great Lakes** (Illinois, Indiana, Michigan, Ohio, and Wisconsin); **Plains** (Iowa, Kansas, Minnesota, Missouri, Nebraska, North Dakota, and South Dakota); **Southeast** (Alabama, Arkansas, Florida, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, South Carolina, Tennessee, Virginia, and West Virginia); **Southwest** (Arizona, New Mexico, Oklahoma, and Texas); **Rocky Mountain** (Colorado, Idaho, Montana, Utah, and Wyoming); and **Far West** (Alaska, California, Hawaii, Nevada, Oregon, and Washington).

BEA's major national, regional, international, and industry estimates; the *Survey of Current Business*; and BEA news releases are available without charge on BEA's Web site:

<www.bea.gov>

Summary BEA estimates are available on recorded messages at the time of public release at the following telephone numbers:

(202)606-5306 Gross domestic product
606-5303 Personal income and outlays
606-5362 U.S. international transactions

Most of BEA's estimates and analyses are published in the *Survey of Current Business*, BEA's monthly journal. Subscriptions and single copies of the printed Survey are for sale by the Superintendent of Documents, U.S. Government Printing Office. Internet: <bookstore.gpo.gov>; phone: 202-512-1800; fax: 202-512-2250; mail: SSOP, Washington, DC 20402-0001.

1. Net earnings is earnings by place of work -- the sum of wage and salary disbursements (payrolls), other labor income, and proprietors' income -- less personal contributions for social insurance plus an adjustment to convert earnings by place of work to a place-of-residence basis.

Note: Estimates may not add to totals because of rounding.
